

GOP1004 INSTRUCTION MANUAL

Thank you very much for your purchase of GOP1004 Relay Box for Tube type transmitter.

How To Connect

1. Connect the **Red** cord of Red/Black cord to **(+) side** of 13.8V DC power source.
2. Connect the **Black** cord of Red/Black cord to **(-) side** of 13.8V DC Power source. (Be sure to connect correctly.)
3. Connect the cord with plug of "IN" side to the telegraph key. (Connect the "Shield" side/outer conductor of the cord to the **earth** terminal of telegraph key. Connect the core wire/inner conductor to the terminal insulated. Be careful not to make reverse connection.)
4. Connect the cord with plug of "OUT" side to the telegraph key terminal of the transmitter. (Connect the "**Shield**" side/outer conductor of the cord to the **Earth** and **core wire**/inner conductor to the "**IN**" side.)

Note: The circuits of "IN" and "OUT" of GOP1004 are insulated.
